Director of Product Strategy with 10+ years of experience in financial services product management. Own product roadmaps from discovery through delivery, translating complex business processes into clear requirements and shipping solutions that drive measurable outcomes. Lead cross-functional teams across engineering, data, and business stakeholders to integrate AI capabilities, modernize platforms, and deliver user-centric products.

EXPERIENCE

Director, Product Strategy Nov 2022 — Present

Credigy Solutions

- Own the product portfolio and roadmap from discovery through delivery, driving alignment across engineering, data, design, and business teams
- Lead cross-functional groups on enterprise solution delivery including Azure migration, Snowflake data platform transitions, and Master Data Management
- Define success metrics, run agile ceremonies, and integrate AI-assisted development and prototyping into product workflows

Product Manager Aug 2018 — Nov 2022

Credigy Solutions

- Managed multiple concurrent product initiatives from ideation through delivery, translating complex financial workflows into clear product requirements
- Drove cross-functional collaboration across engineering and business teams, ensuring stakeholder adoption through structured change management and agile delivery practices

Senior Business Systems Analyst Dec 2017 — Aug 2018

Credigy Solutions

- Shipped products that integrated core revenue-generating processes into enterprise web applications
- Built intelligent automation workflows and enabled data-driven decisions through metrics dashboards and content analysis

Business Systems Analyst Oct 2015 — Dec 2017

Credigy Solutions

- Collaborated with internal customers to analyze needs and deliver business scenarios, process flows, and functional/non-functional requirements

Co-Founder May 2013 — Oct 2015

GoodSurv

- Created a mobile application that collected feedback on consumer opinions and shared insights with business partners
- Gained experience in innovation, communication, and building technical solutions from the ground up
